VOICE ARTIST  
AND TRAINER

In almost 20 years in the industry, my voice has been the fabric of many success stories, for hundreds of national and international brands. It can comfort, seduce, and take you on a journey you've never been on before.

### Voice-overs

For me, Voicing goes beyond just sounding good. It's a lot about making the script your own, and resonating with its purpose. I've been mentored by wellknown Hollywood stars, and some incredible trainers back home. I've also been heard on prominent TV channels and across various eminent platforms. With the kind of training and experience I've been exposed to, along with the versatility of my voice, it's easy to adapt to any given script.

### Voice Training

When it comes to voice training, it isn't limited to a certain group of people. You could be a student, a theatre professional, a lawyer, or even a teacher - getting to know your voice and using it effectively is always important. As a voice trainer, my approach is unlike any other. Be it acting voice-overs, speech and diction, or developing communication skills, I conduct one-on-one, as well as group trainings for growth in each of those areas. Practical, interactive and engaging, my training sessions are a place where students learn about the depths of voicing and speech management, and develop into beautiful artists.

I believe that there's a huge potential in people. And through voice-overs and training, my goal is to give them the voice that has a lasting impact, wherever they go.
